Suggestions made:

1. branches of the disbanded State Migration Service are needed, in Naryn there is not enough information on safe and legal migration;
2. it is necessary to promote the ideas of landscaping in the regions, in the villages, the creation of micro-reserves, because the problems of migration, nature protection and the growth of violence are all interconnected and complex work is needed in the villages;
3. it is necessary to actively promote the principles of the new ideology “kyrgyz zharany” in the regions;
4. a government program is needed to reduce the level of unemployment in villages.
